- React, TypeScript, Angular, Node.js, Bootstrap
- HTML, CSS
- PostgreSQL
- Docker, Kubernetes
- Open Telekom Cloud
- Bash
- Usability testing
- GitLab

PROFILE

I am a full-stack software engineer with more than 6 years of experience in B2B environments: three years in frontend web development and more than three years in backend development with Python.

I pride myself on maintaining clean commit histories and producing well-documented, readable code. I practice test-driven development to ensure software quality.

I am particularly interested in software testing, and I have been learning more about structured testing in the software development lifecycle.
